	The MAILING DATE of this communication ap	ppears on the cover sheet with the	correspondence address -			
Period for Reply  A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### **DETAILED ACTION**

1. Claim 1 has been examined.

### Information Disclosure Statement

2. The information disclosure statements (IDS) submitted on 14 July 2004 and 18 November 2004 have been considered by the examiner.

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Gharachorloo et al. (US PGPub # 2002/0083274), herein Gharachorloo.
  - a. As per Claim 1, Gharachorloo discloses an apparatus for supporting one or more servers on a single semiconductor chip [Figure 1, #102 & 'single chip multiprocessor' as per ¶0044], comprising: a plurality of first-level translation lookaside buffers on the single semiconductor chip [Figure 1, #108, #110 & 'TLBs' as per ¶0053], wherein each first-level translation lookaside buffer is associated with a processor core of a plurality of processor cores on the single semiconductor chip [directly connected to dedicated cache modules as per ¶0045]; and a second-level translation lookaside buffer that is coupled to the

Application/Control Number: 10/787,386 Page 3

Art Unit: 2188

plurality of first-level translation lookaside buffers [Figure 1, #114 & ¶0053]; wherein an access to a page table entry in main memory by a processor core associated with a first-level translation lookaside buffer can be stored in the second-level translation lookaside buffer before being forwarded to the first-level translation buffer associated with the processor that requested the page table entry [data transported through the L2 cache as per ¶0145]; whereby storing the page table entry in the second-level translation lookaside buffer eliminates a need to refer to main memory to access the same page table entry if another processor requests the same page table entry [data being sourced from the L2 cache as per ¶0145].

### Conclusion

- 4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Horne et al. (US Patent # 5,237,694) discloses a locking buffer for allowing access to exclusive, critical processes employed on a plurality of single chip processors. Brayton et al. (US Patent # 5,623,628) discloses a multi-level hierarchical memory that promotes a non-blocking request queue.
- 5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patrick M. Moore whose telephone number is (571) 272-1239. The examiner can normally be reached on M-F 8:30AM 5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mano Padmanabahn can be reached on (571) 272-4210. The fax phone
